FALL 2022

FREDERKING & THALER

Dear colleagues and friends,

In these hard times we just keep faith with our mission and continue making good books, which correspond to the spirit of the time and to the needs of our readers. At the same time we contribute as much as we can to support Ukraine in this situation. We donate and we are happy to present several books, which spread the knowledge about this country. I am lucky to have one of these books in this Foreign Rights Catalogue and to be able to present it and discuss it and many other books from this catalogue with you at Frankfurt Book Fair.

Frederking & Thaler delves into the fascinating places, people and stories Ukraine has to tell. The authors and photographers of „Ukraine“ travelled thousands of kilometers to find all those authentic stories worth telling. Another big highlight I am proud to present is „In the realm of silence“, which is a collection of award-winning underwater photography.

Bruckmann continues the best-selling series „Secret Cities“ and „Secret Places“, which has become international since the English-language edition of „Secret Cities Europe“ has been published. In this program we are happy to present „Secret Cities Spain“ and „Secret Cities Portugal“.

National Geographic is happy to present a fascinating book on ICARUS project, a fundamental research project on behavioral biology.

My creative colleagues from the cookbook team of **Christian Verlag** identified a new trend: Pinsa! Besides, they are presenting a cookbook for all Harry Potter fans with the atmosphere of magical Christmas.

GeraMond has a special book for all football fans with an amazing Q&A game: „The last shot of wisdom“.

Besides a wonderful minimalistic book on knitting in Japandi style, as well as lots of other books on creative work, drawing & painting and handicraft, my colleagues from **Christophorus** team are presenting a unique book on furniture makeover. Upcycling is totally in!

I am so excited to discuss our new catalogue's titles with you!

If you would like to take a closer look at them – please do not hesitate to contact me.

Kindest regards,

Anna Travkina

The big book of tractors

A machine that changed the world

Albert Mößmer

168 pages, 22.5 x 27.1 cm, ~ 190 images

Hardcover

Retail price: €32.99

Publication date: October 2022

The world of tractors

For centuries, horses and other draft animals helped farmers in their important work. The history of motorization through self-propelled transporter began in the 1870s. Steam engines were the first invention used by the farmers. From the end of the 19th century, the triumph of tractors with combustion engines took this role over. Tractor lover Albert Mößmer follows this exciting history of technology from the very beginning up to the present.

- The complete history of the most important agricultural machine
- Richly illustrated and explained in detail by tractor expert Albert Mößmer
- Perfect for farmers and tractor enthusiasts

Use your food!

Fruit and vegetables that are no longer fresh often end up in the trash. In most cases it happens just because a delicious idea for spontaneous use is missing. In many cases overripe fruit and vegetables stay in the supermarket. In order to change that, this book inspires people to save carrots, peppers, apples, etc. from the dustbin and use them in a tasty way.

- Throwing away and not buying old and overripe vegetables and fruit was yesterday!
- Rescuing food feels good - and tastes good!
